OCEANOGRAPHY AND FISHING INSTITUTE ACTIVE;  
NEW CABLEWAYS INSTALLED

SPLIT INSTITUTE CONDUCTS RESEARCH -- Zagreb, Vjesnik, 25 Mar 51

At the Institute of Oceanography and Fishing in Split, 14 scientific workers and their assistants are studying the biology, physics, and chemistry of the sea, the types of algae in the Adriatic, and the life of the sardine and codfish.

A separate laboratory does research on the utilization and nutritive value of fish, mussels, and other products of the sea.

The biological and hydrochemistry sections of the institute are primarily research sections, while the fishing and biological section is the most important to the economy. The latter also has a subsection for improving fishing techniques, and for analyzing types of ships, nets, and other equipment.

The institute issues a periodical in French and English.

INSTALL CABLEWAYS IN GORSKI KOTAR FOREST AREA -- Ljubljana, Slovenski Poročevalec, 21 Apr 51

Five cableways of Yugoslav make are now being installed in the forest area in Gorski Kotar. These cableways will make it possible to haul logs to the forest road 400 meters away. Such cableways have been very successful for they make it possible to haul 30 to 35 cubic meters of wood per hour, work which would require 10 to 30 pairs of horses.

The new cableways will increase the number of cableways in Gorski Kotar to 15.
